KnuKonceptz KonFUSED Distribution System

Our KonFUSED system lets you tailor our fuse block to fit your systems needs. Included with each block are several compression fittings. These fittings accommodate various gauges and are interchangeable. These blocks have the ability to accept our Mini-ANL fuses (MIDI/AFC) Fuse size ranges from 30A all the way up to 150A!

Here are the basic steps to using your new block:

- Remove 5/8” of the jacket
- Insert wire through fitting
- Fold wire around the fitting
- Insert fitting into block and tighten
