

### **KnuKonceptz KonFUSED Distribution System**

Our KonFUSED system lets you tailor our fuse block to fit your systems needs. Included with each block are several compression fittings. These fittings accommodate various gauges and are interchangeable. These blocks have the ability to accept our Mini-ANL fuses (MIDI/AFC) Fuse size ranges from 30A all the way up to 150A!

Here are the basic steps to using your new block:

 A close-up photograph of a black electrical wire with its outer jacket removed, showing the bare copper strands. The number "5145" is printed on the black jacket.	 A photograph showing a silver metal compression fitting being inserted into the end of the wire. The fitting has "Hable 316" printed on it.	 A photograph showing the wire being folded back around the silver metal fitting. The fitting has "Hable 316" printed on it.	 A photograph showing the wire and fitting assembly being inserted into a black metal fuse block. The fitting has "Hable 514" printed on it.
Remove 5/8" of the jacket	Insert wire through fitting	Fold wire around the fitting	Insert fitting into block and tighten
